DIGITAL CONTENT SYNDICATION

HOW IT WORKS

CONTENT CREATION & SYNDICATION

Thousands of health-related websites, apps, and social media platforms continue to create original digital health resources for their websites, apps, and social media. This includes blogs, podcasts, videos, images, and data dissemination. With syndicated content partners from 38 health-related websites, original content is updated on the site, making updates accessible through traditional SEO.

CONTENT DISSEMINATION & CONSUMPTION

State and local health departments, as well as other partners, can access any of the health-related websites, either for free or subscription. Partners can reach the content and share it to reach more people across the country. The sites offer a searchable directory of content, allowing partners to access, manage, and share the content they need.

HOW IT'S MAKING A DIFFERENCE

50 states
20 countries
