---

Hello,

I would just like to inform you that Subject 001023 on Cohort 2 of CA24914 was admitted to the hospital for a brain aneurysm on (b) (6). We were informed on 17-SEP-2018. According to her son, it's a subarachnoid hemorrhage. The son stated that Subject 001023 underwent medical procedures to drain the aneurysm. The physician at the hospital expressed to him that it could take up to 10 days for recovery. At this time, that's all the information he knows. I have told him that once discharged, to sign a medical record release form.

This subject was randomized to a VLN test product on Day 1 (02-AUG-2018). Subject 001023 has thus far completed study conduct, and was awaiting the follow-up phone call scheduled on 21-SEP-2018.

Please let me know if you have any questions,  
Best Regards

(b) (6) Clinical Study Manager
