**SUBJECT: PERIODIC REPORT for STN PM0000012**

Dear Sir or Madam:

Swedish Match North America ("Swedish Match" or "we") writes in regard to FDA's Marketing Order PM0000012 for General Portion Original Large ("PM0000012"), included below as **Attachment A.2016-PM0000012**.

Per requirements under section 910(f) of the FD&C Act, we are submitting a Postmarket Annual Report ("Report") for PM0000012 beginning October 2016 so that FDA may determine whether continued marketing of the tobacco product is appropriate for the protection of public health or whether there are or may be grounds for withdrawing or temporarily suspending the Marketing Order.

Periodic Report for the following tobacco product:

STN	PM0000012
Tobacco Product Name	General Portion Original Large
Applicant	Swedish Match North America
Date of Report	10/31/2016
Reporting Period	4/6/2016 – 10/1/2016
Marketing Order Status USA	In market date is 4/6/2016
Marketing Status Outside USA	Commercially distributed in Sweden. No sales in EU member states. All other sales as governing law permits.

30 We set forth below our response to each Agency request enumerated in the Marketing Order. As  
31 directed by FDA, we are providing this single submission in response to the Marketing Order.

32 Swedish Match submits this Report with the confidence that continued marketing of the tobacco  
33 product is appropriate for the protection of public health.

34 Swedish Match submits that this submission and the information we are supplying in connection  
35 with this Report, are trade secret, proprietary information that is protected under state and federal law  
36 from public disclosure. This information should therefore be handled in accordance with the security  
37 procedures adopted by FDA in connection with enforcement of the FD&C Act.

38 If further information is required, please contact us.

39 Sincerely yours,

40 (b) (6)  
41

42 Gerard J. Roerty, Jr.

43 Vice President, General Counsel & Secretary

**Swedish Match Reply to section III. Periodic Reporting Information Request:**

The information requested in the Marketing Order, Periodic Reporting, is reproduced below in bold type followed by Swedish Match's reply.

**III.1. A single submission with a cover letter that includes the following text in your subject line PERIOD REPORT FOR STN: PM0000012. The cover letter should include the STN and corresponding name, applicant name, date of report, reporting period, and marketing order status outside the United States.**

**Swedish Match Reply to III.1. for PM0000012:**

Please see cover letter above.

**III.2. A summary of how the tobacco product continues to be appropriate for the protection of the public health which includes:**

- a. A status report of ongoing studies and a summary of completed studies about the tobacco product conducted by, or on behalf of, the applicant;**
- b. A summary of significant findings on publications not previously reported and include full articles. Any new scientific data (published or otherwise) should also be reported on the likelihood of product use by current users of tobacco products within the same tobacco product category, current users of tobacco products in other tobacco product categories, former users of any tobacco product, and youth and young adults;**
- c. A summary of adverse experiences with this tobacco product reported to you, providing a listing and analysis (accompanied by a statement of any changes to the reference risk information and a summary of important risks, including the nature, frequency, and potential risk factors) of all adverse experiences including those serious and unexpected adverse experiences reported previously.**
- d. A summary of sales and distribution of the tobacco product: Total U.S. sales reported in dollars, units, and volume with breakdowns by US census region, major retail markets, and channels in which the product is sold (e.g., convenience stores, food and drug markets, big box retailers, internet/online sales, tobacco specialty shops);**
- e. Data on current product users. Data should be collected about new users, current users, those who have switched tobacco products, and multiple product users. The results should be broken down by key demographic variables including age, gender, and race/ethnicity. Also, any change in the intended target market for the product should be reported. The data described above may include sales data and post-marketing analysis.**

**Swedish Match Reply to III.2.a. for PM0000012:**

We assert the tobacco product continues to be appropriate for the protection of public health as there has been no change in product characteristics relative to the PMTA marketing order. As the study identified below is ongoing, no other conclusions can be drawn for this specific products appropriateness

for the protection of public health.

A Tobacco User Tracking Study is ongoing. Study detail and status is as follows:

- Title: Tobacco User Tracking Study
- Product(s) included:
  - Snus (any brand, ever used)
  - General Snus (any sub-brand, ever tried, ever purchased, currently purchased, used most often). Please note that the sample size for General snus brands is very small.
- Timing (start/end date): March/September 2016
- Description: Survey of consumers, including users and non-users of tobacco, meant to measure perceptions and behaviors related to tobacco usage. Specific focus on health risks, quitting, and where snus fits into the health risk continuum.
- Study Status: Ongoing
- Demographics and Geography: Study output is meant to reflect general US population, segmented by tobacco usage (none, current, past). Balanced across all other demographics and geography.
- Design: Online survey. Questionnaire has gone through past cognitive testing. About 10-15 minutes in length depending on the respondent.
- Conducted by: M/a/R/C Research, on behalf of Swedish Match.

We are providing data crosstabs for March-June 2016 (Q1/Q2). (See Attachment 2A.2016-PM0000012 and Attachment 2B.2016-PM0000012.) We believe crosstab analysis fully presents our information without bias.

The study is ongoing. Thus, data for the remaining July-September 2016 (Q3) cannot be provided at this time because it would not be weighted to match the population, i.e., Q3 would be inconsistent with Q1/Q2.

Swedish Match Reply to III.2.b. for PM0000012:

Swedish Match is supplying a summary of publications not previously reported (see Table 2b-1 below). Full text articles are available in Attachment 2C.2016-PM0000012.

Table 2b-1. Summary of publications.

Item #	Publication Citation
1.	<p>Burris, J.L., et al. 2016. "A longitudinal, naturalistic study of U.S. smokers' trial and adoption of snus." <i>Addictive Behaviors</i>, 63. 82-88.</p> <p>SM notes the following points expressed in the publication:</p> <ul style="list-style-type: none"><li>• From consumer sample of adult smokers with no intention to quit (n=626), were advised to quit tobacco use and offered snus, then followed for a year.</li><li>• Study developed predictors of snus use, described in odds ratios.</li><li>• Subgroups are more receptive to snus use than others: current and former smokers are more likely to report snus use than never smokers.</li><li>• Males (OR=2.33) increased trial, frequent use, and adoption; a higher perceived likelihood of using snus to reduce smoking (OR=1.45) affected trial and use; higher perceived likelihood of using snus (OR=1.28) to cope with smoking restrictions affected use.</li></ul>

Item #	Publication Citation
2.	<p>Han, J., et al. 2016. "Bacterial populations associated with smokeless tobacco products." <i>Applied and Environmental Microbiology</i>. doi:10.1128/AEM.01612-16.</p> <p>SM notes the following points expressed in the publication:</p> <ul style="list-style-type: none"> <li>• Moist snuff products exhibited higher levels of bacteria and diversity of bacterial populations than snus and chewing tobacco.</li> <li>• Because many of the bacterial species have the ability to reduce nitrate to nitrite and thus contribute to the production of TSNA's, this is worthy of future studies.</li> <li>• Snus appears to be inhibitory towards bacterial growth (which may be the result of the lower pH or moisture content in snus or the presence of antimicrobial compounds in the products).</li> </ul>
3.	<p>Hausmann, H.-J. and M.W. Fariss. (2016). "Comprehensive review of epidemiological and animal studies on the potential carcinogenic effects of nicotine per se." <i>Critical Reviews in Toxicology</i>, 46(8). 701-734.</p> <p>SM notes the following points expressed in the publication:</p> <ul style="list-style-type: none"> <li>• Concern has been raised by world health organizations that nicotine may be a causal factor in carcinogenesis.</li> <li>• Article includes any study involving a nicotine delivery system (e.g. NRT) and excludes any study where users are exposed to nicotine and other compounds (e.g. snus).</li> <li>• Article not relevant.</li> </ul>
4.	<p>Kozlowski, L.T. and D.B. Abrams. 2016. "Obsolete tobacco control themes can be hazardous to public health: the need for updating views on absolute product risks and harm reduction." <i>BMC Public Health</i>, 16:432. doi:10.1186/s12889-016-3079-9.</p> <p>SM notes the following points expressed in the publication:</p> <ul style="list-style-type: none"> <li>• Focused on health organizations' tendency to "throw the baby out with the bathwater" in terms of lumping "dramatically less dangerous" smokeless products (including snus) in with the dangers of combustible tobacco products.</li> <li>• Snus has substantially lower harms than cigarettes yet are treated the same as cigarettes.</li> <li>• Swedish data does not support the hypothesis that snus is a gateway to future smoking – though it strengthens common liability model argument.</li> <li>• Research on snus in Sweden and Norway demonstrate how providing accurate risk information to smokers results in increased quit-rates.</li> <li>• Evidence exists that snus can aid in cessation, so long as accurate health risk information is provided; update framing of tobacco control argument to include a continuum of risk.</li> </ul>

11.	<p>Wilson, K.M., et.al. 2016. "Snus use, smoking and survival among prostate cancer patients." <i>International Journal of Cancer</i>. doi:10.1002/ijc.30411.</p> <p>SM notes the following points expressed in the publication:</p> <ul style="list-style-type: none"> <li>• Snus use was associated with increased risks of prostate cancer and total mortality among 9,582 prostate cancer patients (out of a cohort of 336,381 Swedish construction workers).</li> <li>• Compared to never users of tobacco, exclusive snus users had a 1.24 HR (Hazard Ratio) increased risk of developing prostate cancer, suggesting the presence of tobacco specific carcinogens outside of combustible products.</li> <li>• Authors discuss limitations of study including (1) they only have one assessment of tobacco use taken on average 20 years before diagnosis, (2) the lack of detailed smoking history, and (3) lack of information on BMI at later time points as obesity plays a role in prostate cancer progression and the exclusive snus users had a higher BMI on average.</li> </ul>

**Swedish Match Reply to III.2.c. for PM0000012:**

Swedish Match did not receive any reports of serious or unexpected adverse experiences, as defined on page 3 of the Marketing Order for PM0000012, relative to this tobacco product for the reporting period 4/6/2016 through 9/30/2016. There have been no changes to the reference risk information, i.e., risk information provided in conjunction with this PMTA and found in the Summary of the MRTPA, on pages 83-137 of that submission.

We are supplying a summary of consumer complaints (all other reported adverse experiences) relative to this tobacco product for the reporting period 4/6/2016 through 9/30/2016 in **Attachment 2D.2016-PM0000012.**

**Swedish Match Reply to III.2.d. for PM0000012:**

Swedish Match is supplying a summary of sales and distribution data for the reporting period 4/6/2016 through 9/30/2016 in **Attachment 2E.2016-PM0000012.** This information includes total U.S. sales reported in dollars and units (i.e., number of cans), and volume (i.e., net weight multiplied by units) with breakdowns by US census region and retail markets and channels in which the product is sold (e.g., convenience stores, food and drug markets, big box retailers, internet/online sales, tobacco specialty shops).

**Swedish Match Reply to III.2.e. for PM0000012:**

Swedish Match will perform post market surveillance in conjunction with an MRTP order. To date, Swedish Match has not received approval from FDA with respect to its MRTP Application. Thus, no post market analysis has been conducted and no current product user data is available for this product for the reporting period 4/6/2016 through 9/30/2016.

Other than the sales and distribution data supplied in **Attachment 2E.2016-PM0000012** above, there is no current product user data for the reporting period 4/6/2016 through 9/30/2016 for this product. Likewise, there has been no change in the intended target market for this product for the reporting period 4/6/2016 through 9/30/2016.

154 **III.3. A description of each change made to the manufacturing, facilities or controls during the**  
155 **reporting period, including:**

- 156 **a. A comparison of each change to what was described in the PMTA;**  
157 **b. The rationale for making each change; and**  
158 **c. A certification that the reported change did not result in any modification (including a**  
159 **change in design, any component, any part, or any constituent, including a smoke**  
160 **constituent, or in the content, delivery or form of nicotine, or any other additive or**  
161 **ingredient) of the tobacco product; the basis for concluding that each change did not**  
162 **result in any modification to the final product.**

163  
164 **Swedish Match Reply to III.3. for PM0000012:**

165 Swedish Match has made no changes to the manufacturing, facilities or controls for this product  
166 during the reporting period 4/6/2016 through 9/30/2016.  
167  
168

169 **III.4. A summary of all manufacturing deviations, including those associated with processing, testing,**  
170 **packing, labeling, storage, holding and distribution and indicate a deviation that may affect the**  
171 **characteristics of the final product.**

172  
173 **Swedish Match Reply to III.4. for PM0000012:**

174 Swedish Match is supplying a summary of all manufacturing deviations, including those associated  
175 with processing, testing, packing, labeling, storage, holding and distribution and indicated any deviation  
176 that may affect the characteristics of the final product for the reporting period 4/6/2016 through  
177 9/30/2016 in **Attachment 4A.2016-PM0000012.**  
178  
179

180 **III.5. Full-color copies of all advertising for the tobacco product that has not been previously**  
181 **submitted, along with the original date the advertisements were first disseminated and the date**  
182 **the advertisements were discontinued; and**  
183

184 **Swedish Match Reply to III.5. for PM0000012:**

185 Swedish Match is supplying full-color copies of all advertising for this tobacco product, for the  
186 reporting period 4/6/2016 through 9/30/2016, in **Attachment 5A.2016-PM0000012.** First disseminated  
187 and discontinuation dates are indicated next to the advertisement. Advertisements are still in market  
188 unless a discontinuation date is indicated.  
189  
190

191 **III.6. In all annual reports, include a description of any or all labeling changes and submit revised full**  
192 **color final printed labeling.**

193 **a. The labeling should include all the panels, be presented in the actual size and color with**  
194 **legible text.**

195 **b. For the first annual report only, submit all final printed labeling (actual labeling for each**  
196 **required warning distributed with the product); include labels, inserts/onserts,**  
197 **instructions, and other accompanying information or materials for this product.**

198  
199 **Swedish Match Reply to III.6. for PM0000012:**

200 Swedish Match is supplying a copy of the final printed labeling, i.e., actual labeling, inserts/onserts,  
201 instructions, for this tobacco product for the reporting period 4/6/2016 through 9/30/2016 in

202 **Attachment 6A.2016-PM0000012.**

203 As directed in III.6.b. above, we will also mail samples of the actual labeling for PM0000012 to the  
204 address indicated on page 5 of the Marketing Order.  
205

**MARKETING ORDER**

Swedish Match North America, Inc.  
Attention: Gerard Roerty, Jr., Vice President, General Counsel & Secretary  
Two James Center  
1021 East Cary Street, Suite 1600  
Richmond, VA 23219  
*via Certified Mail*

**FDA Submission Tracking Number (STN): PM0000012**

Dear Mr. Roerty:

The Food and Drug Administration (FDA) completed the review of your Premarket Tobacco Product Application (PMTA) submitted under section 910(b) of the Federal Food, Drug, and Cosmetic Act (FD&C Act), for the following tobacco product:

<b>Applicant:</b>	Swedish Match North America, Inc.
<b>Tobacco Product Name:<sup>1</sup></b>	General Portion Original Large
<b>Tobacco Product Category:</b>	Smokeless Tobacco
<b>Tobacco Product Sub-Category:</b>	Portioned Snus
<b>Package Type:</b>	Plastic Can
<b>Package Quantity:</b>	24.0 g
<b>Characterizing Flavor:</b>	None
<b>Portion Count:</b>	24 pouches
<b>Portion Mass:</b>	1000 mg
<b>Portion Length:</b>	33 mm
<b>Portion Width:</b>	18 mm
<b>Portion Thickness:</b>	6 mm
<b>Tobacco Cut Size:<sup>2</sup></b>	(b) (4)

Based on our review of your PMTA, we find permitting the new tobacco product specified above to be marketed is appropriate for the protection of public health, and that you have met the other requirements of section 910(c) of the FD&C Act. Under the provisions of section 910, you may introduce or deliver for introduction into interstate commerce the new tobacco product specified above with the enclosed labeling.

<sup>1</sup> Brand/sub-brand or other commercial name used in commercial distribution

<sup>2</sup> The applicant provided fraction scale weight buckets to characterize the tobacco cut size. Therefore, the tobacco cut size cannot be represented with a single value and corresponding range limit.

Page 2, PM0000012

**RECORD RETENTION**

Under section 910(f) of the FD&C Act, we are requiring in this order that you retain the records listed below for a period of not less than 4 years from the date of distribution of the last batch of the new tobacco product specified above. These records must be legible, in the English language, and available for inspection and copying by officers or employees duly designated by the Secretary, upon request:

- PMTA submitted prior to product order
- Postmarket reports/postmarket status reports submitted to FDA, including adverse experiences and all relevant documentation associated with the experience
- Correspondence with FDA pertaining to authorized product
- Nonclinical or clinical study documentation including:
  - study protocols (including statistical analysis plan);
  - amendments showing the dates and reasons for each protocol revision;
  - Institutional Review Board (IRB) or Independent Ethics Committee (IEC) approvals;
  - Informed consent forms;
  - Correspondence with study monitors/investigators/contract research organizations/sponsors/IRB/IEC;
  - Investigator financial disclosure statements;
  - Progress reports;
  - Monitoring reports;
  - Adverse experience reports;
  - Case report forms/subject diaries/medical records/laboratory reports;
  - Subject data line listings/observations records;
  - Test article accountability records;
  - Study results/protocol summaries/study reports; and
  - Certifications and amendments to certifications.
- Records pertaining to the manufacture, in process and release testing, process (including any changes to the process, facility, or controls), packaging, and storage of product
- Records pertaining to the sale, marketing, distribution, or other disposition of the product
- Specimens of all labeling, labels, inserts/onserts, instructions, and other accompanying information
- Hazard analysis

**POSTMARKET REPORTS****I. Serious and Unexpected Adverse Experiences Reporting**

Under section 910(f) of the FD&C Act, we are requiring in this order that you report to the FDA all adverse experiences that are both serious and unexpected and your analysis of the association between the adverse experience and the tobacco product **within 15 calendar days** after the report is received by you. These experiences may become known to you through a response to a customer complaint, request, or suggestion made as a result of an adverse experience, tobacco product defect, or failure reported to you; or identified in the literature or media. Your information should be submitted with a cover letter that includes the following text in the subject line: **SERIOUS UNEXPECTED ADVERSE EXPERIENCE REPORT for STN PM0000012.**

## Page 3, PM0000012

For purposes of reporting under this order, serious adverse experience means an adverse experience that results in any of the following outcomes:

- Death;
- A life-threatening adverse event;
- Inpatient hospitalization or prolongation of existing hospitalization;
- A persistent or significant incapacity or substantial disruption of the ability to conduct normal life functions;
- A congenital anomaly/birth defect; or
- Any other adverse experience that, based upon appropriate medical judgment, may jeopardize the health of a person and may require medical or surgical intervention to prevent one of the other outcomes listed in this definition.

For purposes of reporting under this order, unexpected adverse experience means an adverse experience occurring in one or more persons in which the nature, severity, or frequency of the experience is not consistent with:

- The known or foreseeable risks associated with the use or exposure to the tobacco product as described in the PMTA and other relevant sources of information, such as postmarket reports and studies;
- The expected natural progression of any underlying disease, disorder, or condition of the persons(s) experiencing the adverse experience and the person's predisposing risk factor profile for the adverse experience; or
- The results of nonclinical laboratory studies.

## II. Manufacturing Deviations

You should promptly investigate all manufacturing deviations, including but not limited to those associated with processing, testing, packing, labeling, storage, holding and distribution. For products that have been distributed, if the deviation may negatively impact public health, you must promptly identify and report that deviation to the Center for Tobacco Products. See instructions below for submitting your regulatory correspondence.

## III. Periodic Reporting

Under section 910(f) of the FD&C Act, we are requiring in this order that you submit, on an annual basis, beginning October 2016, unless otherwise notified, the following information in a postmarketing annual report to help FDA determine whether continued marketing of your tobacco product is appropriate for the protection of public health or whether there are or may be grounds for withdrawing or temporarily suspending such order. For the 12- month reporting period, the report must include:

1. A single submission with a cover letter that includes the following text in your subject line: **PERIODIC REPORT for STN PM0000012**. The cover letter should include the STN and corresponding tobacco product name, applicant name, date of report, reporting period, and marketing order status outside the United States.
2. A summary of how the tobacco product continues to be appropriate for the protection of the public health which includes:
  - a. A status report of ongoing studies and a summary of completed studies about the tobacco product conducted by, or on behalf of, the applicant;

## Page 4, PM0000012

- b. A summary of significant findings on publications not previously reported and include full articles. Any new scientific data (published or otherwise) should also be reported on the likelihood of product use by current users of tobacco products within the same tobacco product category, current users of tobacco products in other tobacco product categories, former users of any tobacco product, and youth and young adults;
  - c. A summary of adverse experiences with this tobacco product reported to you, providing a listing and analysis (accompanied by a statement of any changes to the reference risk information and a summary of important risks, including the nature, frequency, and potential risk factors) of all adverse experiences including those serious and unexpected adverse experiences reported previously.
  - d. A summary of sales and distribution of the tobacco product: Total U.S. sales reported in dollars, units, and volume with breakdowns by US census region, major retail markets, and channels in which the product is sold (e.g., convenience stores, food and drug markets, big box retailers, internet/online sales, tobacco specialty shops);
  - e. Data on current product users. Data should be collected about new users, current users, those who have switched tobacco products, and multiple product users. The results should be broken down by key demographic variables including age, gender, and race/ethnicity. Also, any change in the intended target market for the product should be reported. The data described above may include sales data and post-marketing analysis.
- 3. A description of each change made to the manufacturing, facilities or controls during the reporting period, including:
  - a. A comparison of each change to what was described in the PMTA;
  - b. The rationale for making each change; and
  - c. A certification that the reported change did not result in any modification (including a change in design, any component, any part, or any constituent, including a smoke constituent, or in the content, delivery or form of nicotine, or any other additive or ingredient) of the tobacco product; the basis for concluding that each change did not result in any modification to the final product.
- 4. A summary of all manufacturing deviations, including those associated with processing, testing, packing, labeling, storage, holding and distribution and indicate a deviation that may affect the characteristics of the final product.
- 5. Full-color copies of all advertising for the tobacco product that has not been previously submitted, along with the original date the advertisements were first disseminated and the date the advertisements were discontinued; and
- 6. In all annual reports, include a description of any or all labeling changes and submit revised full color final printed labeling.
  - a. The labeling should include all the panels, be presented in the actual size and color with legible text.
  - b. For the first annual report only, submit all final printed labeling (actual labeling for each required warning distributed with the product); include labels, inserts/onserts, instructions, and other accompanying information or materials for this product.

In accordance with 40 CFR 1506.6, we will make your environmental assessment publicly available.

Page 5, PM0000012

This order authorizing the marketing of this new tobacco product does not mean FDA “approved” the new tobacco product specified above; therefore, you may not make any express or implied statement or representation directed to consumers that conveys, or misleads or would mislead consumers into believing, among other things, that the new tobacco product specified above is “approved” by FDA. See Section 301(tt) of the FD&C Act. This marketing order is subject to withdrawal or temporary suspension under section 910(d) of the FD&C Act.

We remind you that all regulated tobacco products, including the new tobacco product specified above, are subject to the requirements of Chapter IX of the FD&C Act and its regulations. These requirements currently include, but are not limited to, annual registration, listing of products, listing of ingredients, reporting of harmful and potentially harmful constituents, and payment of user fees. There are also packaging, labeling, and advertising requirements with which you must comply. It is your responsibility to ensure the tobacco product specified above complies with all applicable statutory and regulatory requirements. FDA will monitor your compliance with these applicable statutes and regulations.

If you discontinue the manufacture, preparation, compounding or processing for commercial distribution this tobacco product and later decide to reintroduce the product into the market, please contact the Office of Science to discuss if additional information is necessary.

For more information on your responsibilities under the FD&C Act, we encourage you to visit our website at <http://www.fda.gov/TobaccoProducts>. You may also obtain information by contacting FDA’s Center for Tobacco Products at 1-877-CTP-1373, [AskCTP@fda.hhs.gov](mailto:AskCTP@fda.hhs.gov), or [SmallBiz.Tobacco@fda.hhs.gov](mailto:SmallBiz.Tobacco@fda.hhs.gov).

We remind you all regulatory correspondence can be submitted via the FDA Electronic Submission Gateway (<http://www.fda.gov/esg>) using eSubmitter or by mail to:

Food and Drug Administration  
Center for Tobacco Products  
Document Control Center  
Building 71, Room G335  
10903 New Hampshire Avenue  
Silver Spring, MD 20993-0002

We are unable to accept regulatory submissions by electronic mail.

How much do you agree or disagree with the following statements? I use or have used nicotine replacement therapy products... - ...as a complement to cigarettes where smoking is not allowed
91	79	q54) Did you previously, that is before you started to use Nicotine Replacement Therapy Products, use any form of tobacco daily?
92	80	q56) You indicated that you are a current user of cigarettes and/or rolling cigarettes. The following questions in this section will ask you about your current and past cigarette/rolling cigarette usage. Approximately how long have you smoked cigarettes or rolling tobacco? If you have smoked for several periods, and quit in between, we ask you to please state the total time you have smoked. For example if you smoked for 5 years, quit for 1 year, and have smoked for the past 2 years - please indicate 7 years.
97	81	q57) How old were you the first time you used a cigarette?
100	82	q59) How old were you when you started smoking cigarettes? - Daily
103	83	q60) How old were you when you started smoking cigarettes? - Weekly
106	84	q61) We would like to know how frequently you smoke cigarettes. Do you smoke:
107	85	q62) Thinking about the past 30 days, how many of those days did you smoke cigarettes?
110	86	q63) Approximately how many packs of cigarettes do you smoke in a typical week?
112	87	q64) Approximately how many packs of cigarettes did you smoke in a typical week, 1 year ago?
114	88	q65) How soon after getting up in the morning do you smoke your first cigarette?
115	89	q66) Have you ever tried to quit smoking?
116	90	q67) How many times have you tried to quit where you stopped smoking or drastically cut down on your smoking for at least a week?
117	91	q68) How long were you able to quit smoking the last time you attempted to quit (your most recent attempt to quit)?
118	92	q69) How long were you able to quit smoking the time previous to the last time you attempted to quit (your second most recent attempt to quit)?
119	93	q70) How long ago was it that you last tried to quit smoking?
120	94	q71) Did you use any aids/substitutes (if any) for smoking when trying to quit? (Please check all that apply) If you attempted to quit multiple times, please think about the last time you attempted to quit. If you attempted to quit multiple times, please think about the LAST TIME you attempted to quit.
121	95	q72) Did you continue to use any of the aids/substitutes when you started smoking again, after attempting to quit?
122	96	q73) How long have you been smoking cigarettes and using Snus at the same time?

For example if you used snus for 5 years, quit for 1 year, and have used snus for the past 2 years - please indicate 7 years.
203	159	q123) Weekly means using snus at least once week for at least one month. How old were you when you started using snus weekly?
206	160	q124) On average, how many cans did you use at that time, per week?
208	161	q127) How old were you the first and last time you started using snus? - First Time
211	162	q128) How old were you the first and last time you started using snus? Last Time
214	163	q130) On average, how many snus pouches did you use at the time you started using snus? - Daily
216	164	q131) On average, how many snus pouches did you use at the time you started using snus? - Weekly
217	165	q132) We would like to know how frequently you use snus. Do you use snus:
218	166	q133) Thinking about the past 30 days, how many of those days did you use snus?
221	167	q134) Approximately how many pouches of snus do you use in a typical day?
223	168	q135) Approximately how many cans of snus do you use in a typical week?
225	169	q136) Approximately how many cans of snus did you use in a typical week, 1 year ago?
227	170	q137) How soon after getting up in the morning do you have your first snus pouch?
228	171	q138) To quit means not using snus for at least three months, except for temporary slip of a day or two. Have you ever tried to quit using snus?
229	172	q139) How many times have you tried to quit where you stopped using snus or drastically cut down on using snus for at least a week?
230	173	q140) How long were you able to quit using snus the last time you attempted to quit (your most recent attempt to quit)?
231	174	q141) How long were you able to quit using snus the time previous to the last time you attempted to quit (your second most recent attempt to quit)?
232	175	q142) How long ago was it that you last tried to quit using snus?
233	176	q143) Did you use any aids/substitutes (if any) for snus when trying to quit?

Page ----	Table -----	Title -----
234	177	q144) Do you continue to use any of the aids/substitutes when you started using snus again, after attempting to quit?
235	178	q145) How long have you been using snus and using Cigarettes at the same time?
236	179	q146) How long have you been using snus and using Moist snuff at the same time?
237	180	q147) How long have you been using snus and using Loose leaf chewing tobacco at the same time?
238	181	q148) How long have you been using snus and using Other tobacco products at the same time?
239	182	q149) How long have you been using snus and using Nicotine patches at the same time?
240	183	q150) How long have you been using snus and using Nicotine chewing gum at the same time?
241	184	q151) How long have you been using snus and using Other Nicotine Replacement Therapy Products at the same time?
242	185	q152) Do you use snus less now that you use an additional tobacco product(s)?
243	186	q153) How much less snus do you consume since using an additional tobacco product(s)? Please select the answer that is closest to the amount you now snus while using another tobacco product.
244	187	q154) Now that you continue to use another tobacco product in addition to your using snus, how does this affect your total tobacco consumption? Do you believe that your total tobacco consumption...?
245	188	q155) If you look 6 months ahead, do you think you will change your snus consumption?
246	189	q156) If you were to quit using snus (or quit again), which (if any) of the following products do you think you would use on a temporary basis instead of snus? (i.e. you would use them only to assist in quitting, then cease usage)
247	190	q158) When you think about brands of snus, which one brand first comes to mind?
248	191	q159) What other brands of snus can you think of? Please list all brands you know separated by commas.
249	192	q158/q159) Total Unaided Snus Awareness
250	193	q160) Which of the following brands of snus have you heard of? (Please check all brands you have heard of even if you mentioned them before)
251	194	q158/q159/q160) Total Snus Awareness
252	195	q161.1) Snus Vetted Status
253	196	q161) Which brands of snus have you EVER tried?
254	197	q162) Which of those brands have you EVER purchased on a regular basis?
255	198	q163) Which brands of snus do you CURRENTLY purchase on a regular basis?

Page ----	Table -----	Title -----
434	361	q202) You indicated that you have formerly used snus. The following questions in this section will ask you about your past snus usage. To quit means not using snus for at least three months, except for temporary slip of a day or two. How many times have you quit using snus?
436	362	q204) How old were you the first and last time you quit using snus? - First Time
440	363	q205) How old were you the first and last time you quit using snus? - Last time
444	364	q207) Approximately how long did you use snus before quitting? If you had used snus for several periods, and quit in between, we ask you to please state the total time you had snused. For example if you snused for 5 years, quit for 1 year, snused for 2 more years and then quit - please indicate 7 years.
446	365	q208) At the time you quit using snus, approximately how many cans of snus were you using in a typical week?
448	366	q209) How long ago did you quit using snus?
449	367	q210) Before finally quitting, had you ever tried to quit using snus before?
450	368	q211) How many times, before finally quitting, had you tried to quit where you stopped snusing or drastically cut down on your snusing for at least a week?
451	369	q212) Did you return to snus after the first time you quit snus?
452	370	q213) From the point when you quit using snus that first time, how many months passed before you returned to using snus?
454	371	q214) How long were you able to quit using snus the last time you attempted to quit (your most recent attempt to quit)?
455	372	q215) Did you return to using snus after you tried to quit using snus the last time?
456	373	q216) How many months passed before you returned to using snus, after you tried to previously quit the last time?
457	374	q217) When you restarted using snus after you tried to quit using snus the last time, how old were you?
460	375	q218) How long were you able to quit using snus the time previous to the last time you attempted to quit (your second most recent attempt to quit)?
461	376	q219) Did you use any aids/substitutes (if any) for using snus when you quit snusing?
462	377	q220) How long did you use snus and smoke cigarettes at the same time?
463	378	q221) How long did you use snus and use moist snuff at the same time?
464	379	q222) How long did you use snus and use loose leaf chewing tobacco at the same time?
465	380	q223) How long did you use snus and use other tobacco products at the same time?
466	381	q224) How long did you use snus and use nicotine patches at the same time?

1063	979	q370) You indicated that you are a current user of chewing tobacco. The following questions in this section will ask you about your chewing tobacco usage. Approximately, how long have you used chewing tobacco? If you have used chewing tobacco for several periods, and quit in between, we ask you to please state the total time you have used chewing tobacco. For example if you used chewing tobacco for 5 years, quit for 1 year, and have used chewing tobacco for the past 2 years - please indicate 7 years.
1065	980	q371) About how many chewing tobacco pouches do you use in total per week?
1066	981	q372) About how many chewing tobacco pouches did you use in total per week 1 year ago?
1067	982	q373) How soon after getting up in the morning do you have your first chew?
1068	983	q374) Have you ever tried to quit using chewing tobacco?
1069	984	q375) How many times have you tried to quit where you stopped chewing or drastically cut down on your chewing tobacco usage for at least a week?
1070	985	q376) How long were you able to quit chewing the last time you attempted to quit (your most recent attempt to quit)?
1071	986	q377) How long were you able to quit chewing the time previous to the last time you attempted to quit (your second most recent attempt to quit)?
1072	987	q378) How long ago was it that you last tried to quit using chewing tobacco?
1073	988	q379) Did you use any aids/substitutes (if any) for chewing tobacco when trying to quit?
1074	989	q380) Do you continue to use any of the substitutes when you started chewing again, after attempting to quit?
1075	990	q381) Do you use chewing tobacco less now that you use an additional tobacco product(s)?
1076	991	q382) How much less chewing tobacco do you consume since using an additional tobacco product(s)?
1077	992	q383) Now that you continue to use another tobacco product in addition to chewing tobacco, how does this affect your total tobacco consumption? Do you believe that your total tobacco consumption...?
1078	993	q384) If you look 6 months ahead, do you think you will change your chewing tobacco consumption?
1079	994	q385) Do you use more, less or about the same amount of chewing tobacco as you did 6 months ago?
1080	995	q386) If you were to quit chewing (or quit again), which (if any) of the following products do you think you would use on a temporary basis instead of chewing tobacco? (i.e. you would use them only to assist in quitting, then cease usage).
1081	996	q387) If you were to quit chewing (or quit again), which (if any) of the following products do you think you would use on an ongoing basis instead of chewing tobacco? (i.e. you would use these even after quitting chewing).
1082	997	q388) When you think about brands of chewing tobacco, which one brand first comes to mind?
1083	998	q389) What other brands of chewing tobacco can you think of?

q56) You indicated that you are a current user of cigarettes and/or rolling cigarettes. The following questions in this section will ask you about your current and past cigarette/rolling cigarette usage. Approximately how long have you smoked cigarettes or rolling tobacco? If you have smoked for several periods, and quit in between, we ask you to please state the total time you have smoked. For example if you smoked for 5 years, quit for 1 year, and have smoked for the past 2 years - please indicate 7 years.

Table 80

q56) You indicated that you are a current user of cigarettes and/or rolling cigarettes. The following questions in this section will ask you about your current and past cigarette/rolling cigarette usage. Approximately how long have you smoked cigarettes or rolling tobacco? If you have smoked for several periods, and quit in between, we ask you to please state the total time you have smoked. For example if you smoked for 5 years, quit for 1 year, and have smoked for the past 2 years - please indicate 7 years.

q207) Approximately how long did you use snus before quitting? If you had used snus for several periods, and quit in between, we ask you to please state the total time you had snused. For example if you snused for 5 years, quit for 1 year, snused for 2 more years and then quit - please indicate 7 years.

Table 364

q207) Approximately how long did you use snus before quitting? If you had used snus for several periods, and quit in between, we ask you to please state the total time you had snused. For example if you snused for 5 years, quit for 1 year, snused for 2 more years and then quit - please indicate 7 years.

Table 953

q335) You indicated that you currently or formerly used Nicotine Replacement Therapy Products. The following questions in this section will ask you about your current and past Nicotine Replacement Therapy Products usage. How long have you used or previously used Nicotine Replacement Therapy Products (nicotine patches, -chewing gum, -pills, -inhaler or similar)? If you have used Nicotine Replacement Therapy Products for several periods, and quit in between, we ask you to please state the total time you have used them. For example if you used Nicotine Replacement Therapy Products for 5 years, quit for 1 year, and have used them for the past 2 years

Table 953

q335) You indicated that you currently or formerly used Nicotine Replacement Therapy Products. The following questions in this section will ask you about your current and past Nicotine Replacement Therapy Products usage. How long have you used or previously used Nicotine Replacement Therapy Products (nicotine patches, -chewing gum, -pills, -inhaler or similar)?If you have used Nicotine Replacement Therapy Products for several periods, and quit in between, we ask you to please state the total time you have used them. For example if you used Nicotine Replacement Therapy Products for 5 years, quit for 1 year, and have used them for the past 2 years

q363) You indicated that you are a current user of pipes. The following questions in this section will ask you about your pipe usage. How long have you been smoking pipe tobacco? If you have smoked a pipe for several periods, and quit in between, we ask you to please state the total time you have smoked pipe tobacco. For example if you smoked a pipe for 5 years, quit for 1 year, and have smoked a pipe for the past 2 years - please indicate 7 years.

q370) You indicated that you are a current user of chewing tobacco. The following questions in this section will ask you about your chewing tobacco usage. Approximately, how long have you used chewing tobacco? If you have used chewing tobacco for several periods, and quit in between, we ask you to please state the total time you have used chewing tobacco. For example if you used chewing tobacco for 5 years, quit for 1 year, and have used chewing tobacco for the past 2 years - please indicate 7 years.
