

NOTICE OF DEVIATION

Section 1 (To Be Completed By The Person Discovering The Deviation)

Study Number: TOX210

Source Document(s): ☒ Protocol ☐ SOP (List SOP Number(s)):

Describe the Requirement (give section numbers for SOPs):

On page 7 of the protocol, it states: "Following allocation into groups, mice will be uniquely identified with their permanent identification number by tail tattoo [SOP TOX041]."

Describe the Deviation: Date of Occurrence: April 15, 2008

On April 15, 2008, mice were uniquely identified with their permanent identification number by tail marking with indelible ink instead of tattoo.

Documented By: Paul H. Ayres

Date: Jan. 20, 2009

Section 2 (To Be Completed By The Study Director)

Describe the Corrective Action(s) To Be Taken In Response To The Deviation:

No corrective actions are required.

Assessment Of The Deviation's Impact Upon The Outcome Of The Study:

Based upon the short term nature of this study (2-weeks) it was not necessary to tattoo the tails of the mice. Marking with indelible ink served to uniquely identify the individual mice. This deviation had no effect on the outcome of the study.
